

Gorilla Bags – General Waste

Green Gorilla specialise in providing long term sustainable solutions for all your recycling and waste requirements.

Gorilla Bags are the perfect solution for:

- Demolition, construction or DIY projects
- Sites where there are space or access constraints
- Garden waste
- Inorganic waste from commercial and household clean-ups

Constructed from durable, recyclable polyethylene, Gorilla Bags are tough enough to handle up to 1000kg loads. Simply fill the bag with your waste, call or email us to request a collection and we'll take it away.

Your waste will be transported to Onehunga where it will be processed through our resource recovery facility. Our specialised sort line recovers the recyclable and reusable materials and either processes them on site or delivers them to nearby users.

Using **GREEN GORILLA** minimises waste sent to landfill.

GENERAL WASTE

3 cubic metres – 1000kg

USES: Construction and demolition sites, renovations, commercial premises, household clean-ups, garden clean-ups.
